Bread Legal and Illegal

The Royal Baking Powder is a pure, grape cream of tartar powder. Its greater healthfulness and absolute superiority over other powders are shown by the United States Government official tests, and are so universally recognized that its use is approved and encouraged by health officers at home and abroad.

Guard your food against the alum baking powders.

Alum baking powders are considered so injurious to health, and their premiscuous sale a source of such danger, that their use is univerally condemned by physicians and health officers. In many States the law requires that they shall be branded to warn consumers that they contain alum.

In the District of Columbia, under the laws of Congress, the use of alum in bread, biscuit, cake and other food is a misdemeanor.

Alum baking powders may be known by their price. Powders sold from ten to twenty-five cents a pound, or twenty-five ounces for twenty-five cents, are not made of cream of tartar.
